

DRINKING WATER PROBLEM CORRECTED

Butler Water Department

Customers of Butler Water Department were notified on 3/3/2015 of a problem with our drinking water and were advised to boil your water as a precautionary measure before using it. We are pleased to report that the problem has been corrected and that it is no longer necessary to boil your water before using it. All tests taken throughout the water system confirmed that Butler water continues to meet all drinking water standards and you can now begin using the water as you did before the advisory. There is no need for further action on your part. We apologize for any inconvenience and thank you for your patience during this precautionary measure.

As always, you may contact Keith Smith at 973-838-7200 X. 413 or with any comments or questions.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the Butler Water Department. State Water System ID#: NJ1403001. Date distributed: 3/4/2015.
