**2009 H1N1 Injectable Vaccine Information (go to our FORMS**

**section to download the two needed forms or pick them up at the health department and bring them with you to the clinic)**

You should not get the 2009 H1N1 flu vaccine if you have a severe (life threatening) allergy to eggs, or to any other substance in the vaccine.

*Tell the person giving you the vaccine if you have any sever allergies.* Also tell them if you have ever had

- A life-threatening allergic reaction after a does of season flu vaccine
- Guillain Barre` Syndrome (a severe paralytic illness also called GBS).
- These may not be reasons to avoid the vaccine, but the medical staff can help you decide.

Pregnant or breastfeeding women can get the inactivated 2009 H1N1 flu vaccine.

Inactivated 2009 H1N1 vaccine may be give at the same time as other vaccines, including seasonal influenza vaccine.
