

Application for Generlink

Applicants Address:

Name of owner:

Electricians Name: _____ License Number _____

Phone _____

Installation Date: _____ Butler Power Official _____

Title _____

This application applies to customers served by Butler Municipal Power and Light and covers the installation of Generlink meter pan mounted transfer switch models MA23/24-N/S only. This device must be installed by a licensed electrician. Submit completed application to Line Superintendent Jeff Ricker at jricker@butlerborough.com or mail to Borough of Butler Electric Division, 1 Ace Road, Butler N.J. 07405 Attn: Jeff Ricker. Once the application has been reviewed permission will be granted to the contractor to cut the utility meter pan seal and install the device. It is then the contractor's responsibility to contact the utility via the above methods or by calling 973-838-7200 X511 to advise that the work has been completed. The utility will then respond to install locking meter rings and new seals. There will be no charge from the utility for this service providing it occurs during normal operating hours. The electrician will also be responsible for training the homeowner on the safe and proper use of the device. The utility assumes no liability for the installation, use or performance of the device and reserves the right to temporarily remove said device should we feel it may be causing an issue with distribution service. A copy of this application will be kept on file.
